─ Career Objective ─────────────────

I am a MERN Stack Developer aiming to build practical and impactful web applications. I enjoy working on both frontend and backend to turn ideas into complete products. I'm looking for an opportunity to grow my skills, tackle challenges, and contribute to meaningful solutions.

─ Skills ─────────────────

Expertise: React.js, JavaScript, Firebase, HTML, CSS, Tailwind CSS, DaisyUI, Ant Design, Tanstack Query, Material UI, GitHub, Netlify, Vercel, Firebase Auth & Hosting

Familiar: Next.js, Node.js, Express.js, JWT, MongoDB, Stripe, SSLCommerz

Soft Skills: Fast learner, Adaptability, Problem Solving

─ Projects ─────────────────

1. TourNest ─ Tourism Management System   **Live Link** | **Github-Client** | **Github-Server**

Overview: TourNest is a MERN Stack tourism management platform that allows users to book tour packages, apply as tour guides, share stories, and make secure payments.

Key Features:
- Book tour packages and make secure payments with Stripe.
- Story sharing system.
- Role-based user access.

Tech Stack: React, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, JWT, Firebase Auth, Stripe.

2. Sam's Kitchen — Kitchen Management System **Live Link** | **Github-Client** | **Github-Server**

Overview: Sam's Kitchen is a MERN Stack food delivery and management platform where users can order food, riders can deliver orders, and admins can manage the entire kitchen system.

Key Features:
- Add food to cart, place orders, pay with Stripe or SSLCommerz and download receipts.
- Automatic notification system based on user actions.
- Review sharing system and share food on social media platforms using react-share.

Tech Stack: React, Tailwind CSS, DaisyUI, Ant Design, jsPDF, Node.js, Express.js, MongoDB, JWT, Firebase Auth, Stripe and SSLCommerz Payment Gateway.

3. Studify — Group Study Platform   **Live Link** | **Github-Client** | **Github-Server**

Overview: Studify is a MERN Stack group study platform where students can create assignments, submit work, and peer-review submissions with scoring and feedback.

Key Features:
- Create assignments, update and delete own assignments.
- Submit assignments.
- Receive marks and feedback from peers.

Tech Stack: React, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Firebase Auth & Admin SDK.

─ Education ─────────────────
